## Introducing Lubriplate® SYN-FG SDO

### NSF H1 Registered, Synthetic, Food Machinery Grade Sugar Dissolver Oil.

Lubriplate SYN-FG SDO is an NSF H1 registered synthetic, food machinery grade sugar dissolver oil. This polyalkylene glycol (PAG) -based, water soluble, non-toxic and odorless oil is used to remove sugar, syrup, caramel and fondant residues on lubricated machine components and metal surfaces found in confectionary, baking, beverage and pharmaceutical industries. SYN-FG SDO should also be used to lubricate machine components which are exposed to sugar contamination, such as chains, slides, bearings, cams, tracks, ways, pneumatic cylinders, open gears, fasteners and slicing blades. It's use will reduce and prevent future buildup. In addition to being a multi-purpose lubricant, SYN-FG SDO is also fire resistant. SYN-FG SDO is available in 1-gallon jugs, 5-gallon pails and 55-gallon drums. This product is not compatible with mineral or synthetic hydrocarbon oils.

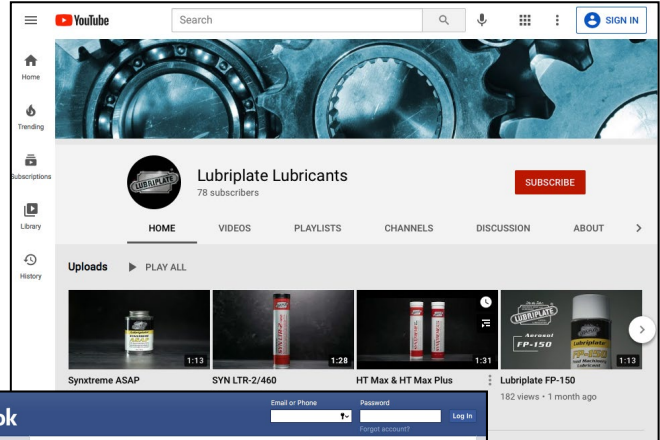

Please contact your Lubriplate District Manager for assistance.

## Lubriplate® Introduces New Digital Content

Are you looking to learn more about Lubriplate's newest products and services? Visit and follow our YouTube, LinkedIn and Facebook pages! There you will find videos introducing new products and their features and benefits as well highlighting some of the value-added services that Lubriplate offers.

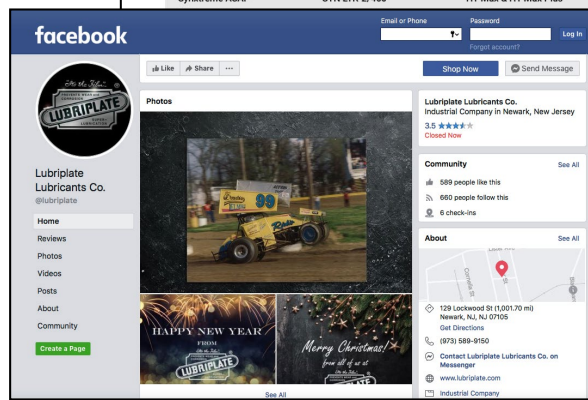

<https://www.youtube.com/user/LubriplateLubricants>

<https://www.linkedin.com/company/lubriplate-lubricants-co/>

[www.facebook.com/Lubriplate](http://www.facebook.com/Lubriplate)

## Lubriplate® provides complimentary, value-added services...

To help you maintain your lubrication program, reduce downtime, and increase productivity.

### Services Include:

#### COMPLETE PLANT SURVEYS

- Determines your exact lubricant requirements.
- Identifies opportunities for improvements and lubricant consolidation.

#### COLOR CODED LUBE CHARTS & MACHINE TAGS

- Helps ensure the correct lubricant is used, prevents misapplication.
- Tags provided for machinery and lube storage containers.

#### LUBRICATION MAINTENANCE SOFTWARE

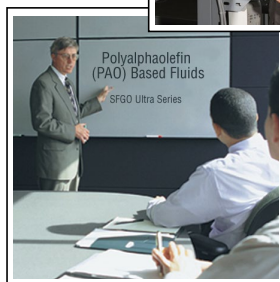

- Tracks lubrication and maintenance schedules.
- Based on a complete survey of the plant and machinery.

#### FOLLOW-UP LUBRICANT ANALYSIS

- Tests for viscosity, acidity, contaminants and wear metals.
- Includes full interpretation and recommended actions.

#### TRAINING PROGRAMS / TECH SUPPORT

- Available on-site, or at a hotel conference room.
- Toll Free Technical Support Hotline and E-mail.

LUBRIPLATE PRODUCT	APPLICATIONS	DESCRIPTION
<b>FMO-85 AW*</b> PART NO. L0880-080 / 5 GALLON PAIL	AIR LINE OIL	80 ZP GRADE *NSF H1 FOOD MACHINERY GRADE
